Wave Eligo: Master the art of living in perfect equilibrium

Has a premium living area with 7 ft long living room balcony

Homebuyers nowadays are looking for a combination of luxury and comfort which enables them to live a perfectly balanced and blissful life. They are also looking for projects which provide sustainable infrastructure, ample amenities and world-class safety features. Keeping this trend in mind, Wave City, North India's first operational hi-tech city in North India launched 'Eligo' under premium residential space.

Eligo is based on modern contemporary architectural trends and sustainable development for the new age aspirational people seeking an urbane and balanced lifestyle.

The project offers the concept of 'sustainable living' that are mostly preferred by the millennials who are looking for premium residential space. The concept of sustainable living is associated with green living, which aims to balance the protection and preservation of earth's natural resources, biodiversity, and habitats within the community. 'Eligo' as a premium residential project has mid-rise (eight-floor), residential apartments consisting of 3 BHK+3T amenity-rich homes with an incessant view lush green parks spread over a huge landscape.

Project design & architecture

'Eligo' has been designed by Philippines based 'Palafox Associates', a multi-disciplinary firm founded by renowned architect and urban planner Felino "Jun" A Palafox Jr. The project has a touch of modern yet contemporary architectural designs.

The premium residences come with state-of-the-art clubhouse, which is already fully operational for its residents, having a swimming pool and a well-equipped gym for the occupants, restaurant, a dedicated yoga space etc. for a wide range of recreational activities. Other key features include dedicated kid's play area, separate area for indoor and outdoor games, multi-purpose hall.

Having spacious structures, 'Eligo' has a premium living area with 7 ft long living room balcony, air-conditioning in all rooms, modular kitchen with well-designed cabinets that provides smart usage of the kitchen space. The residences also feature UPVC sliding door with wire mesh provision.

Each of the towers are surrounded by green spaces with a captivating environment draped with luxury and peacefulness. An abundant open area allowing natural light and ventilation along with the most stunning view of the cityscape from these homes.

Other smart features are motion light sensors, solar power, smart energy metering, PNG connection, etc. with a sense of smart living. From uninterrupted power and water supply to a waste disposable system and Jio fiber connectivity, Eligo promises an urban luxurious lifestyle that makes it stand apart.

Unique location

'Eligo' is well connected within a distance of just five minutes to the nearest metro station. It's also adjacent to the Eastern Peripheral Expressway on one side and Akshardham Temple in the heart of the Capital on the other. Having proximity to nearby Ghaziabad and Noida, Eligo project is just a 15-minute drive away from location.
